

MaxiGro™ plant nutrient is designed for higher growth rates and yields. MaxiGro™ stimulates structural and foliage growth and provides essential minerals. Use MaxiGro™ during the vegetative growth phase to provide a comprehensive diet for hydroponically-grown plants or for soil-grown plants. During flowering, fruiting or vegetable growth, switch to MaxiBloom™. Maintain ideal nutrient pH between 5.5-6.5.

To make plant nutrient: Mix MaxiGro with fresh water	1 GALLON	1 LITER
For seedlings, cuttings, foliar feed, or transplants.	1/4 tsp	.25 gram
For orchids, delicate and slow growing plants.	1/2 tsp	.5 gram
For most applications, salad greens & leafy vegetables.	1 tsp	1 gram
For fast growing plants including many vegetables.	1 1/4 tsp	1.25 gram
For very fast growing plants. Use with caution.	1 1/2 tsp	1.5 gram

Net Wt. 680g (1.5 lbs)
